other.

About Techno India Group

The journey of Techno India Group - the largest educational conglomerate of Eastern India, commenced 4 decades ago.

Established in the 1985 year

**with an ambition of developing educational
institutes in West Bengal,**

Techno India Group began its courses with Science and Engineering, and over the years, it has vastly expanded its academic offerings, which include degrees in Engineering, Science & Technology, Management Studies, other key technology courses like Information and Communication, Nano, Genetics, Biotech, Food, Construction, Sports, Architecture, Biomedical, Paramedical Sciences, Management Sciences, and Media Science. The vision to spread education at micro and macro levels has been an unstoppable endeavour.

Relentless in its pursuit of excellence, Techno India Group is successfully running educational institutions from Kindergarten to PhD, where the comprehensive, structured and state-of-the-art curriculum makes students industry-ready. Over the last three and a half decades, Techno India Group, besides being a front runner in the field of education, has ventured into multifaceted sectors and newer horizons, in areas that complement its efforts in academics, namely Healthcare, Hospitality, Sports, Film Production & Entertainment, Media, Advertising and Tourism.

Sister Nivedita University, a unit of Techno India Group, was established as a tribute to Sister Nivedita on her 150th birth anniversary. It commenced its journey in 2018, and in just four years, has shaped itself into a pioneer seat of learning. The forthcoming ventures of Techno India Group in the education domain are Netaji Subhash University of Sports and Entrepreneurship at Chinsurah (Hooghly), Institute of Medical Sciences and Research, Chandannagar (Hooghly), Techno India University, Agartala (Tripura) and Skill and Knowledge University, Sukna, (Siliguri).

Vision

To create a unique and state-of-the-art learning environment in the country and produce knowledge-based technologists to meet the challenges of a new millennium

Mission

To create a sustainable flow of quality human resources capable of meeting the technological challenges of tomorrow and thereby creating wealth for the nation at the forefront of knowledge. This will be achieved by:

- Rigorous quality and knowledge management at all levels strengthening the institute's capability in scholastic research and learning paths as a continuous process working in tandem with the industries and always remaining proactive to the changing needs of industries
- To produce technocrats for the global market

■ Founder's perspective

"Only education can create ceaseless opportunities for us to explore newer avenues of excellence. To begin with, I am elated that the new International School under the aegis of Techno India Group is commencing its journey in this academic year 2023-24. Our girls are our most precious jewels, to be nurtured with an academic environment aimed at 360-degree development. Techno India pledges to keep providing the young dynamic builders of tomorrow as they embark on a new journey, with the best of education and care."

Sri Satyam Roychowdhury

The Dream School

About Techno India Group World School

Techno India Group World School is conceived not just as a school but a platform to nurture excellence in each child under its umbrella, and to cultivate the nation's dream. The origin of this can be traced back to the launch of Techno India Group Public School, more than one and a half decades ago. Over these years, we have proliferated in sixteen plus locations. Our proven model speaks volumes about our passion and acceptability among the Generation Y and their parents.

Our core values

- Openness & Integrity
- Quality & Knowledge Orientation
- Trust for Achievement Among All Stakeholders

Our goals

To create top quality human resource in India by establishing a world-class learning centre of academic excellence with special emphasis on character and personality development by incorporating modern system of education, latest institutional theories and learning pedagogy, progressive methodologies supported by state-of-the-art technology and infrastructure to facilitate:

- Continuous improvement in all spheres
- Living in harmony

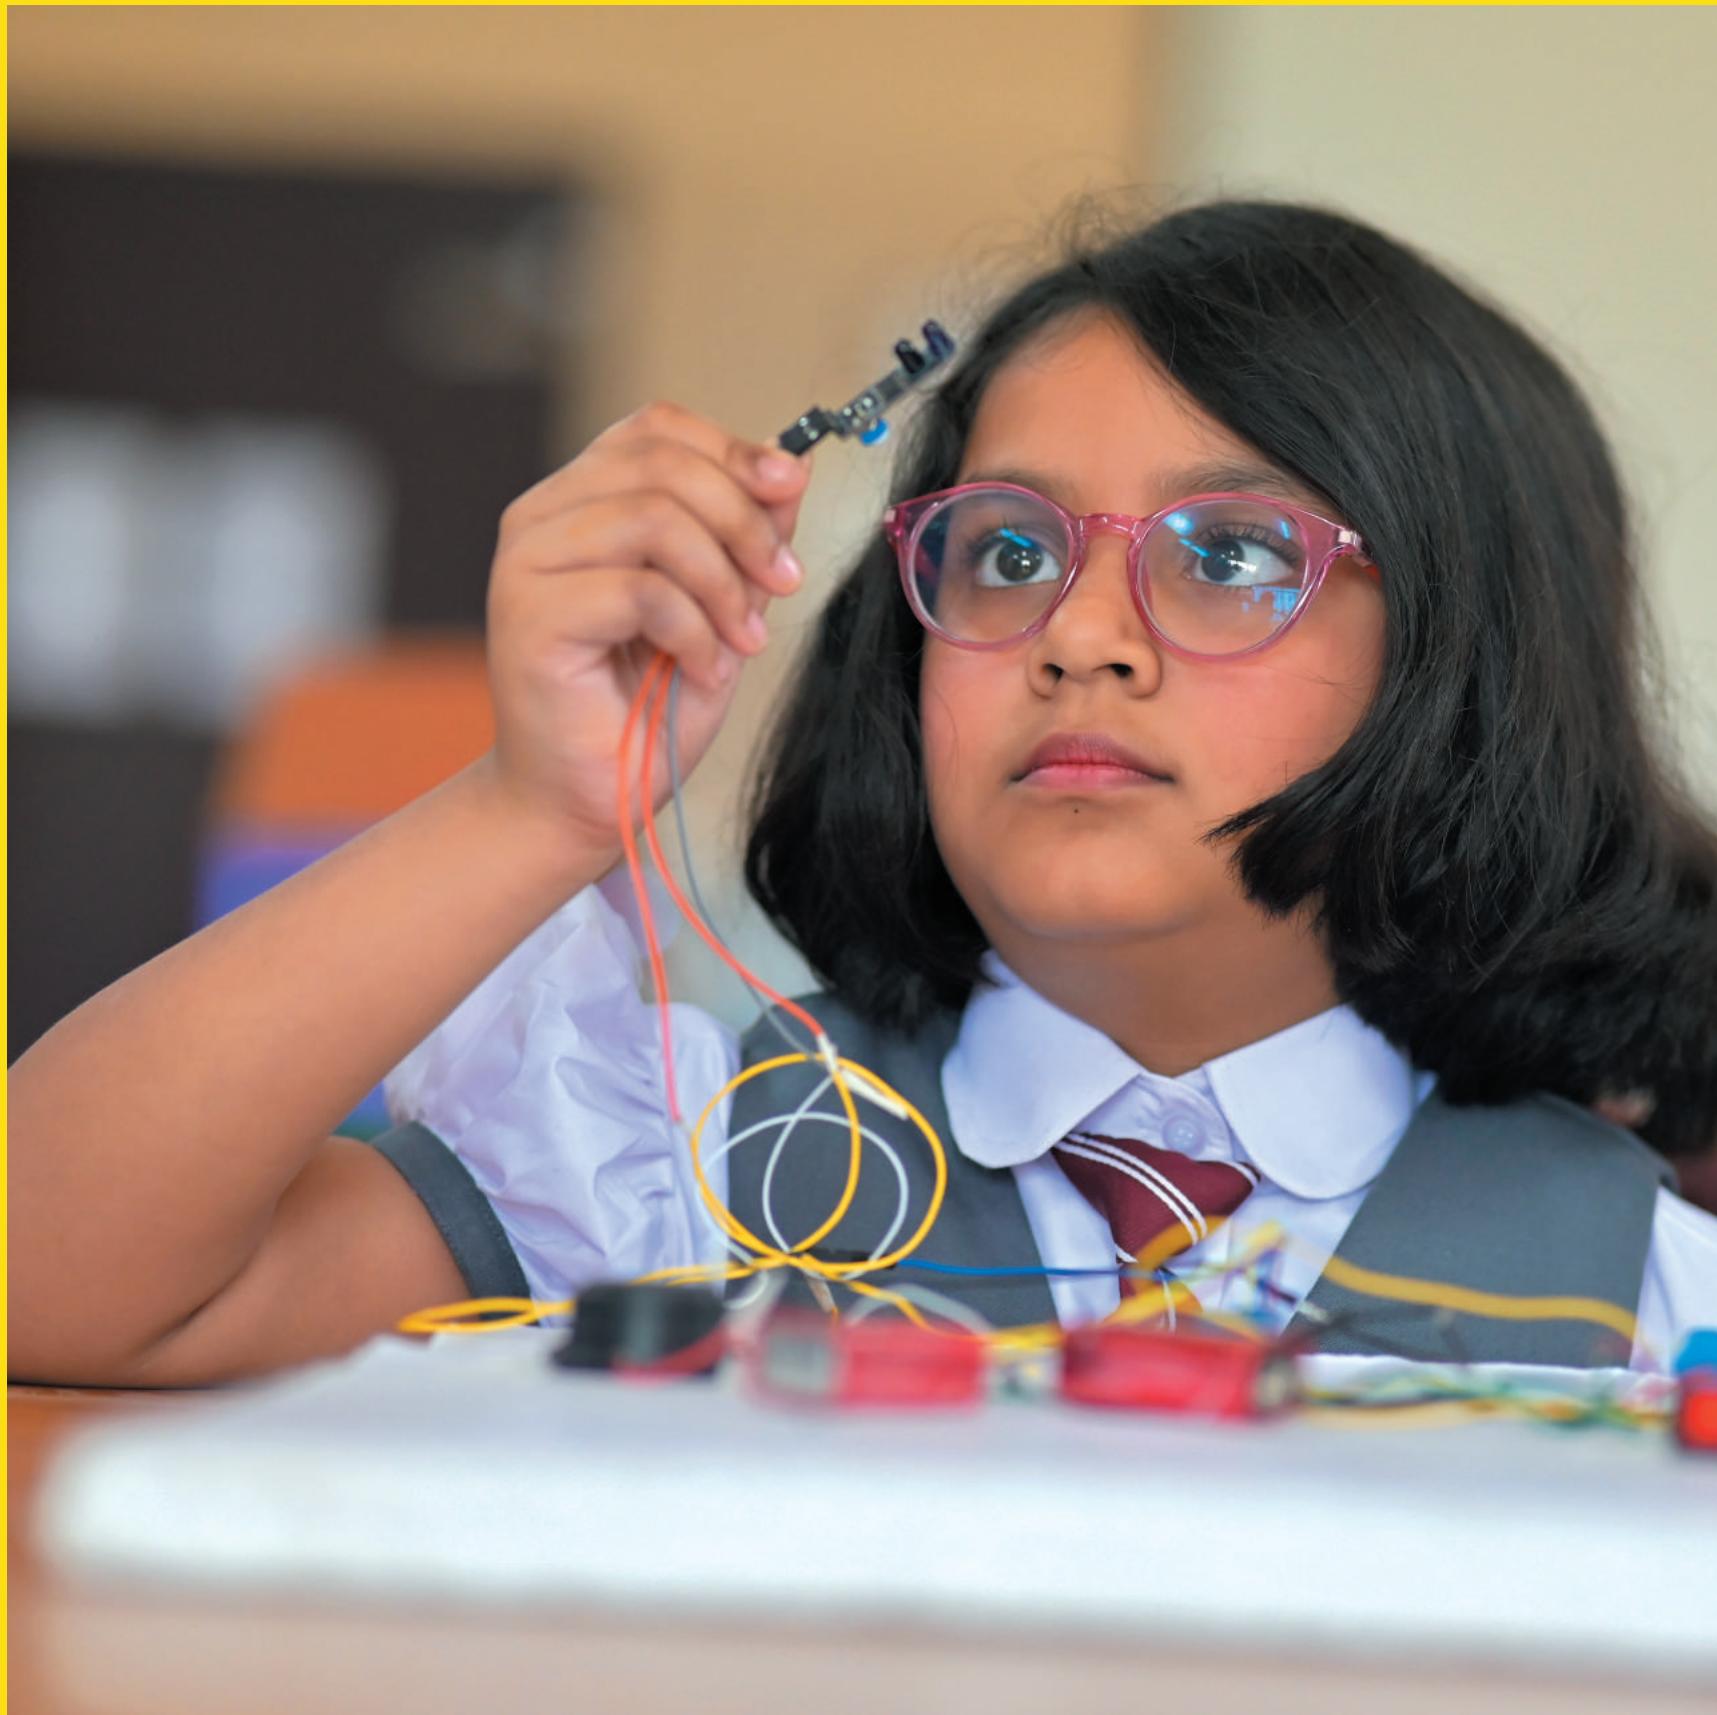

Our Objectives

Techno India Group World School has been conceived as a solution to the growing needs of International Standard Schools in India.

The objectives of Techno India Group World School are as under:

- To formulate a state-of-the-art curriculum plan and implement strategically for the holistic development (physical, mental, emotional, spiritual and intellectual) of Generation Y.
- To provide a conducive environment to develop leadership qualities. Intra and inter personal skills, team spirit, self-esteem and most important—ability to accept failures gracefully so that the children are confident, resilient, and ready to face the challenges of life.
- Continuous encouragement and motivation for enhancing initiative and drive, innovativeness, creative thinking and insatiable appetite.
- Make the children aware of the importance of eco-friendly environment.
- Blend contemporary education with our rich heritage and prepare the new generation to lead our country into the future.

About Techno India Group World School (Siliguri)

A Premier Residential and Day Boarding School for Girls

Breaking barriers opening doors for girls' education

Why an all-girls School

- Girls blossom in an environment where they are not just judged by gender.
- Numerous research indicate – Girls flourish best in an all-girls school environment.
- They get enough space to let their intellectual and physical confidence thrive unconstrained.
- An all-girls environment gives them the opportunity to be independent, ambitious, confident and develop leadership qualities.
- At Techno India Group World School Siliguri, there will be no limitations to your girl's ambitions.
- Enough freedom is given to the girls to fully explore all the available educational opportunities.

Vision

To empower girls to discover their innate potential and hone their transformative skills through creative, intellectual and socio-emotional development, thus creating courageous, visionary, articulate and ethical 21st Century Women World Leaders

Mission

- Carefully develop human resource with social and ethical sensitivity and make them intellectually resilient, creative, innovative women leaders who can serve globally in a plethora of diverse professions;
- Create a framework of international education to attract exceptional girls and focus on inculcating leadership mind frame and entrepreneurial skills in them;
- Incorporate best practices from national and international research and encourage pupils to have global outlook within a complex and hyper-connected world;
- Create a conducive education ecosystem in which, new ideas and innovation flourish, and from which emerge tomorrow's global leaders and technocrats;

Techno India Group World School

Extended day

Perks of our extended day school

Day

Parents residing in the urban areas usually prefer schooling of their children in a day school located at the proximity from their place of stay. A reasonable proximity of the Techno India Group World School to the residential pockets of the town is considered to be convenient for the students and parents.

In the last couple of decades there has been an appreciable increase in the number of nuclear families in not only metros but also tier II & tier III towns, where both the parents are employed in service or engaged in professional /social assignments. The long absence of the parents leave the children lonely, unattended and purposeless after normal day school hours. Keeping these constraints in mind we have planned the Extended Day School for optimum utilization of a child's time after the day school is over.

The Academic Curriculum to be implemented in this format is similar to that of 'Day School', however, it is aimed to lay considerable emphasis on a wide range of multi-disciplinary activities to facilitate multi-faceted development and growth in the children. The special features of the extended day school are given as under:

1. To function 3 to 4 hours extra over and above the normal day school.
2. All children are aimed to be provided with proper lunch and evening snacks from the school cafeteria.
3. Children to be provided with separate locker to facilitate the change to sports/hobby club rig from the school uniform.
4. A variety of frontline field/indoor games will be conducted during the extended hours to help inculcate team spirit, organizing abilities, competitiveness and self-esteem.
5. During the extended hours it is also aimed to conduct extra classes in core subjects to help the slow learners.
6. The activity sheets of various subjects are aimed to be completed in the extended hours thus eliminating the requirement of homework. It can also be utilised for project work.
7. A plethora of co-curricular activities in the field of performing arts comprising classical/modern dances/vocals/instrumental, drawing/clay modelling, story writing and other hobby activities will be conducted in the extended hours, leading to development of creativity, self-expression and other inherent talents of the children.

Techno India Group World School

Residential with weekend break

The opening up of the service sector has resulted in large number of both parents becoming associated with professional assignments involving jobs extending not only from dawn to dusk but also from dusk to dawn. Hence a large number of parents face acute paucity of time to spend with their children except during the weekends. Keeping this in mind, we have conceptualised our residential with weekend break format. This format enables reunion of the children with their parents on Saturdays and Sundays and have the advantage of reducing the level of home sickness experienced by children in fully residential schools.

Techno India Group World School's meticulously planned international standard accommodation facilities and the sumptuous food from the canteen will make the boarding facilities "Home away from home" for the residents. The residential schools will train their sight at development of multi-faceted personality, character building, camaraderie and exceptional qualities of leadership.

Perks of our residential with weekend break:

Develop the creative potentials of the children by involving them in Hobby Workshops on Sculpture, Art & Craft, Pottery, Painting, Cartoon Sketch, Vocal and Instrumental Music, Dramatics etc.

Induce scientific orientation, spirit of discovery and exploration through Nature Club, Astronomy Club, Electronics Club etc.

Improve verbal communication and listening skills by organising debates and workshops by expert resources and written communication by organizing Story/Essay Writing competitions.

Residential

The concept of Techno India Group World School–Residential is similar to that of Techno India Group World School Residential with Weekend Break, except that the children will have long continued stay in the school campus and will reunite with the parents only during vacations and long breaks.

The focus on preservation of our ancient traditions and culture has been the core philosophy of Techno India Group World School. However, the old values must work with new methodologies with integration of technology at appropriate interphase. At Techno India Group World School, our task is to develop intrinsic motivation for self-initiated and self-directed activities among the students and help them to imbibe experiential learning for concept clarity, assimilate positive habits, encourage self-esteem and promote creativity. The experience of education at Techno India Group World School will be a vibrant synergy of all stakeholders viz. students, parents, teachers and school management working in absolute harmony.

**Empowering
tomorrow's
women leaders**

through exceptional teachers

Today's children are the architects of tomorrow. A teacher at Techno India Group World School will be more of a facilitator to prepare the children to undertake tasks and responsibilities of the future. Teaching is an art of assisting explorations and discoveries. As a facilitator, the teacher strives to identify the potential in each student, channelises their talent, stimulates their imagination and intellect and opens the doors of their mind to the powerhouse of knowledge and wisdom. Each teacher at Techno India Group World School goes through an initial training workshop on Contemporary Teaching Methodologies and subsequent Refresher Trainings periodically to provide an effective and enjoyable learning experience to every student.

Inspiring Inquiry Activities

In our lifetime the world has changed beyond our wildest imagination. Who could have foreseen the world of today? A world of smart phones, digital educational contents in tabs, cloud computing, robotics, artificial intelligence, machine learning, blended hybrid teaching-learning etc. India is a proud player in the world stage, where Indians are making their presence felt globally.

At Techno India Group World School, education is not only learning Mathematics, Science, Language, Social Studies, Computers, Foreign Language and Environmental Studies, but more about developing awareness about oneself and the world around. The syllabus is as per CBSE (Central Board of Secondary Education, New Delhi) curriculum with a mix of best learning methodologies from around the world.

Techno India Group World School is India's pioneer to introduce "Education 4.0". Years of extensive research and experience in education has inspired the origin of Techno India Group World School with a conceptual accent on holistic education of a student in an ambience of freedom beyond classroom.

We at Techno India Group World School, understand the need of 21st Century Skills required for complex problem solving and hence our learning model is competency-based, flexible, collaborative, technology enabled and environment blended, which opens up the mind and encourages Critical Thinking and Creativity as guided by National Education Policy 2020.

The journey is as important as destination and Techno India Group World School has ensured an adequate blend of stress-free, enjoyable co-curricular activities and meaningful teaching aids ranging from books to digital contents through digital panels, tabs and wi-fi environment within the campus. Techno India Group World School has been perceived as an answer to the growing demand of world-class schools in India and Asia at large. It has been conceptualised to provide access to world-class curriculum and infrastructure well within the reach of the population of tier II and tier III locations to shape young global minds. Adequate importance is aimed to be given to the universally accepted Indian values, culture and ethos with a blend of modern values and technology to churn out perfect global citizens.

At Techno India Group World School, each of the day-to-day activity is aimed at being environment friendly with optimum use of organic materials, be it organically grown vegetables, fresh milk from the dairy farm, use of manures for growing vegetables, and to avoid (to the extent possible) the use of hazardous chemicals, plastics etc.

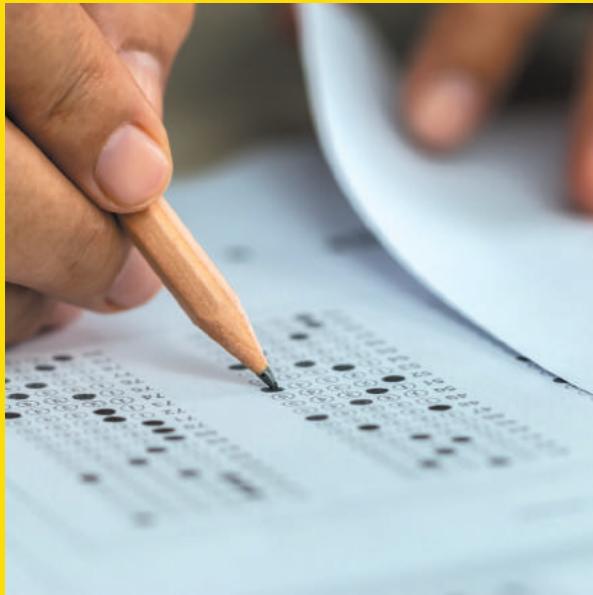

The Digital Edge

The Classrooms of Techno India Group World School are too good to resist. They are digital classrooms with multiple display systems such as digital panels, audio visual aids, digital display systems etc that make learning and teaching an enjoyable experience. Trained faculties will use digital contents on a daily basis making every topics of the curriculum vibrant with graphics, animations and video.

A state-of-the-art Learning Management System based on the pedagogy of blended hybrid teaching-learning is the new normal.

Right from Grade I, the students of Techno India Group World School will have the option of learning coding from experts from different domain.

Techno Ace

Integrated classroom coaching for competitive examinations like JEE (Main and Advance), NEET (UG), ICAR, NDA, CUET, NID/NIFT, CLAT and other entrance exams for UG study programs.

The Program runs parallelly with the School Academic Year Planner. The coaching is held in the school right from standard six to standard twelve, during the school hours by specialised subject experts hired by Techno India Group. Regular Academic Mapping is done through scientifically designed mock tests and composite tests.

Health & Fitness

Techno India Group World School emphasises on the harmonious development of body and mind. A rock-solid foundation laid in the developing years has long lasting benefits. Children need the right environment to express themselves physically and Techno India Group World School has open spaces, playing grounds and a host of options to encourage their spontaneous bodily kinaesthetic activities. Facilities for games, sports, gymnastics, tennis, swimming, rock climbing, calisthenics and even adventure sports for senior students will be available at the school. Occasional International Sports Tours will encourage the children to enhance skills and even pursue a career in sports.

A comprehensive solution to nurture the Kinaesthetic Development in the early years, our special Physical Education and Sports Program offers research based age appropriate and progressive Health & Fitness activities complemented with attractive and innovative play equipment so that your children move with competence and confidence in their growth path.

Techno India Group World School conducts regular YOGA Classes and Meditation Sessions. The breathing, stretching and relaxation exercises help reduce stress, induce harmony and are conducive to emotional and spiritual-wellbeing.

Special Taekwondo self-defence classes are conducted to inculcate fitness, confidence and resilience among the girls.

Music & Culture

Techno India Group World School provides an environment to nurture innate talent in children and allow them to express themselves through music, creative and performing arts. Techno India Group World School will have a music hall to provide the desired ambience in which children can have a strong foundation in the nuances of Music & Dance.

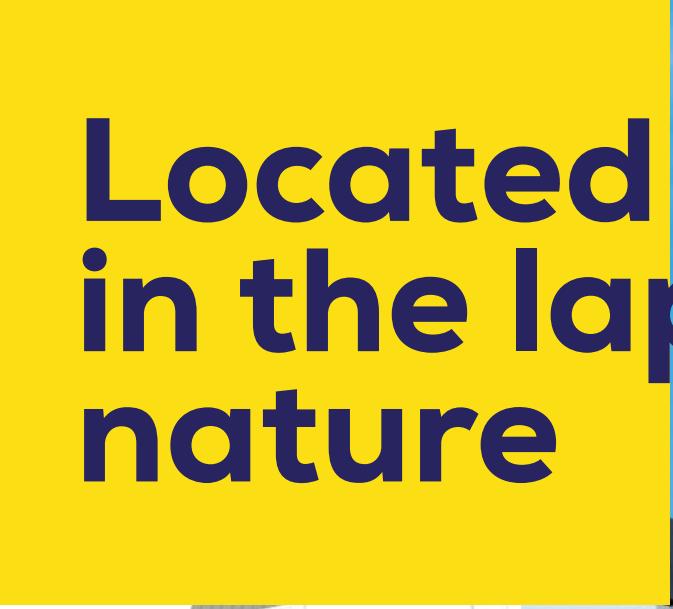

The students will have an access to a collection of eastern and western musical instruments. Under the regular guidance of

trained and experienced music teachers and periodical coaching from celebrity mentors, the students will be exposed to both Indian and Western Music traditions (classical and modern) and recitation.

Special Hobbies Workshops will provide the necessary platform to bring out the hidden performer/artist within each child. The children can express themselves with the paintbrush, pen or pencil or use the clay, chisel and hammer for clay modelling and sculpture in the hobbies workshop.

Other facilities at Techno India Group World School - A Premier Residential & Day Boarding for Girls include:
